

Tips for copying Artwork into Digital Format

Parents can use a scanner or just use their phone or a camera.

If using a phone or camera:

- Place the artwork on a table by a window to get lots of natural light.
- And make sure the focus is correct. The way to do is to frame a bit larger than the artwork with some printed word on the side like the photo below. *Looking at the logo / wording on Farm Bureau helps me make sure the photo is sharp.*
